Application/Control Number: 10/635,757

Art Unit: 3634

Specification

The disclosure is objected to because of the following informalities: On page 4, line 12, "rollers 57" is incorrect.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claims 1-4 and 5-8 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

In claim 1, line 11, "said upper and lower bars" is ambiguous since inner and outer upper and lower bars have been recited.

In claim 5, there is no antecedent basis for "said marginal portions".

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-3,5-7 and 9-11 are rejected under 35 U.S.C. 103(a) as being unpatentable over Gotoh et al in view of Haines.

Gotoh discloses opposing glass panes 11,12, with a window covering therebetween. Outer bar 30 has magnets 24 attached to each end thereof so that movement of the bar 30, within grooves in frame 10, causes corresponding movement of the inner bar16 through interaction with inner magnets 17. See column 3, lines 30-37.

What is not shown is the feature wherein both upper and lower edges of the window covering are moveable so as to maximize shading positions thereof. However, Haines does disclose that such a feature is well known. See movable bars 38,40. In view of this teaching, it would have been obvious to modify Gotoh et al whereby both upper and lower edges of his window covering are movable by way of an additional outer and inner bar such as at 30 and 16.

Regarding claim 2, finger "locations" is a broad term and is met by any "location" where a persons hand engages the outer bar(s) 30.

Regarding claims 7 and 10, the ends of bars 30 have a channel shaped portion for engaging the grooves, these portions defining the broadly recited "finger pockets".

Allowable Subject Matter

Claim 12 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4 and 8 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Blair M. Johnson whose telephone number is (703) 308-0526. The examiner can normally be reached on Mon.-Fri., 6:30-3:00.

Art Unit: 3634

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lanna Mai can be reached on (703) 308-2486. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
